

A PLAN FOR EVERY BUSINESS.

Reach All Your Contacts With Text Messaging

TXTPAGE turns your computer into a text capable cellular phone. Designed for anyone who needs to send short informative text messages to temporary or permanent contact lists.

Contact Wireless offers a comprehensive range of services aimed at enhancing communication and marketing efforts through text messaging. Given the high open rate of text messages, it's a powerful medium for businesses to reach their audience. Take a look at some features you will find:

• 2-Way Messaging

Interactive Messaging: Allows for real-time communication between businesses and customers, facilitating immediate feedback and personalized customer service.

Automated Responses: Set up automated messages for common inquiries, saving time while maintaining engagement with your audience.

• Marketing Text

Subscription Lists: Create and manage lists of subscribers who opt-in to receive marketing messages, offers, and updates.

Segmentation and Targeting: Tools to segment your audience based on preferences, behavior, or demographics to tailor messages more effectively.

Contact Wireless delivers streamlined text messaging services, perfectly tailored to meet the unique needs of various niche markets such as:

Government Collections	Spa/Salon Resorts
Healthcare	Retail and E-commerce
Real Estate	Clubs
Aviation	Team Sports
Automotive	Marketing
Childcare	Staff Communication

Mass Text Messaging - API Available

BULKTEXT™ MESSAGING

Designed to send text messages to large contact lists with individualized message parameters. Bulk Text works much like a mail merge in a .CSV (Excel) format. Contact lists are uploaded and converted to a text format and sent out to clients at a predetermined day and time. An auto-reply feature is also available for targeted keyword campaigns. All message batch sends are logged and tracked.

- **Mass Texting:** Send out large volumes of texts simultaneously, ideal for promotions, alerts, or broad communications.
- **Scheduling:** Plan your messages in advance to go out at the most impactful times without manual intervention.

Text Marketing, Promotions, or Group Messaging

NOTIFYall.com™ GROUP TEXT MESSAGING

Group text messaging designed for seamless delivery to any group size, from a single recipient to 100,000. Notifyall features effortless opt-in/opt-out, a dedicated 10-digit local phone number, and straightforward list management. Ideal for text marketing, one-way group messages, or sending informational reminders. "One Call to Reach Them All."

Group Text Broadcast Service

TxtAlert is a simple, efficient, effective, and affordable group text broadcast service. Each user account is assigned an exclusive 10-digit phone number (long code). Any text message sent to your number can be routed to any combination of cell phones, emails, text capable tablets, or alphanumeric pagers.

- Unlimited sending and receiving ability
Add, remove or change any member of your group at any time through a secure web-based interface or by texting a keyword
- Choose to have messages sent to the entire group or select specific individuals in a group
- Optional canned response to all received messages

TxtLink- Link Driver

Provide information to your customers or guests easily through Text Message. When a customer or guest sends your predetermined "keyword" to your unique phone number we provide to you, the sender is sent an auto-response with specific information or a hot-link to a pre-designated website or website location. Smartphone and tablet users can click directly on any link to easily access the information and have it at their fingertips for continued reference.

API Available
