TEXT MESSAGING
Web-Based Enterprise Grade Text Services

Group Text Broadcast Service

TXT))ALERT™

TxtAlert is a simple, efficient, effective, and affordable group text broadcast service. Each user account is assigned an exclusive 10-digit phone number (long code). Any text message sent to your number can be routed to any combination of cell phones, emails, text capable tablets, or alphanumeric pagers.

- Unlimited sending and receiving ability
  Add, remove or change any member of your group at any time through a secure web-based interface or by texting a keyword

- Choose to have messages sent to the entire group or select specific individuals in a group

- Optional canned response to all received messages

Text Message Contests

Txt-2-Win.com
Text Message Contests

Txt-2-Win gives you the ability to create and automate text contests. With Txt-2-Win you can choose the contest length, create rules for the number of times a contestant can enter, create custom contest keywords, create custom responses and set other parameters. Create a winning text message that can be sent manually or automatically based on the rules you set.

TxtLink- Link Driver

TXT LINK™

Provide information to your customers or guests easily through Text Message. When a customer or guest sends your predetermined "keyword" to your unique phone number we provide to you, the sender is sent an auto-response with specific information or a hot-link to a pre-designated website or website location. Smartphone and tablet users can click directly on any link to easily access the information and have it at thier fingertips for continued reference.

GPS locator feature now available!
